

# Unlock operational efficiency and achieve tangible business outcomes

OpenText Value+ Management Services

## Overview

Maximizing the value of your OpenText investment and ensuring its protection is a strategic advantage for your business. It requires dedicated internal staff to administer, support, maintain, and keep your solution updated. However, these efforts can divert valuable people and resources from other critical business activities.

OpenText Value+ Management Services (V+MS) is here to help you focus on what truly matters. By leveraging our unparalleled expertise and global delivery capabilities, we manage your OpenText solutions from end to end. This not only shifts IT costs from operations but also drives significant value back to your business.

With V+MS, you can redirect your resources to optimize your solutions, enhance their adoption, and continuously derive business value. This allows you to concentrate on strategic initiatives and propel your business forward with confidence.

## Key service options

OpenText Value+ Management Services for your OpenText Software Platform offers the following core service options, designed to address the most pressing challenges organizations face today:

### 1. Continuous Management

- **Engagement and customer success management:** Ensure a dedicated focus on your objectives through strategic engagement and success management.

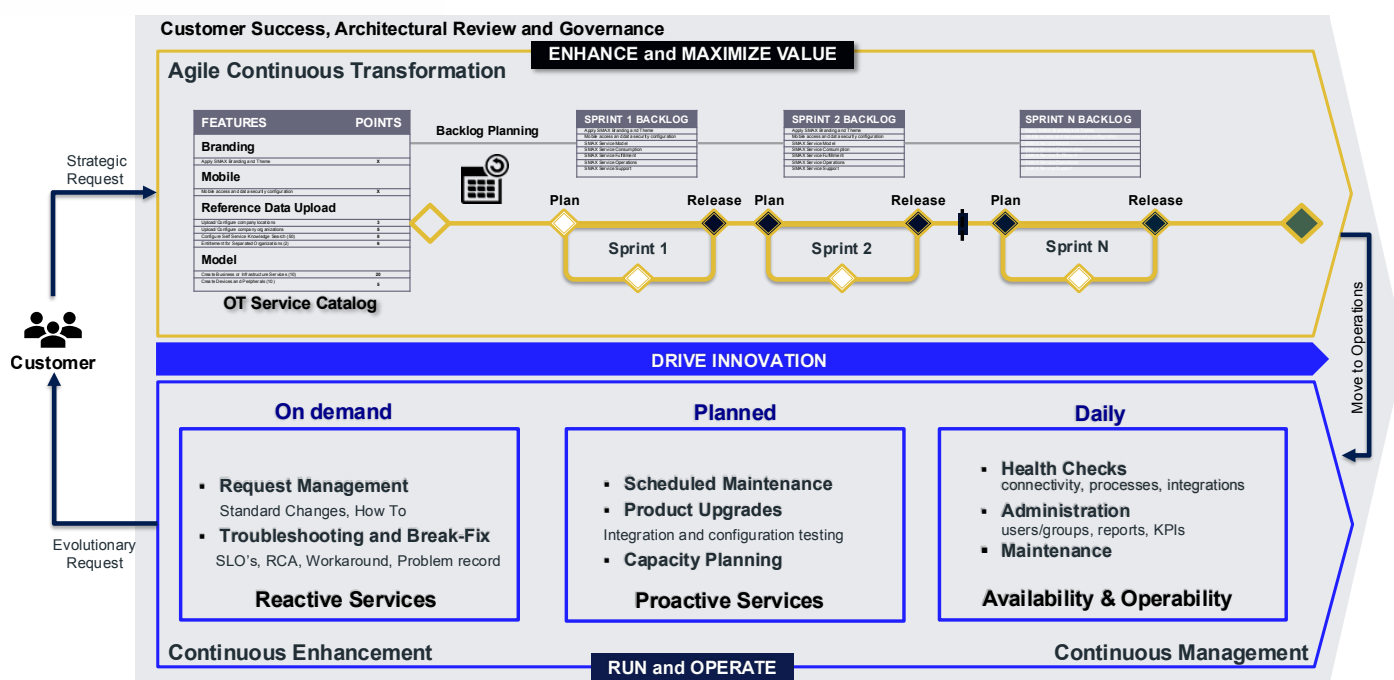

*A growing number of organizations struggle with allocating IT resources toward innovation, as 56 percent of IT budget spent on keeping lights on.<sup>1</sup>*

- **Application health and administration:** Ensure seamless operations through continuous monitoring, administration, and capacity planning.
- **Hosting infrastructure management:** Leverage managed hosting solutions to optimize performance and maintain robust security across environments.
- **Technical advice and application administration:** Benefit from expert insights and tailored advice to enhance application performance and resilience.
- **Break-fix and operational service requests:** Minimize disruptions with proactive issue resolution, ensuring operational continuity.
- **Service levels:** Structured service agreements that guarantee consistent, high-quality support with clear metrics for performance.

## 2. Continuous Enhancement

- **Assessment and competency coaching:** Evaluate your team's capabilities and offer coaching for sustained growth.
- **Innovation workshops:** Foster a culture of innovation within your organization to stay ahead of the curve.
- **Product version upgrades:** Keep your systems current and optimized with regular version updates.
- **Agile continuous transformation:** Empower your team to evolve and improve Agile practices continuously.

## OpenText Value+ Management Service Framework

70 percent CIOs and CTOs view technical debt as major drag.<sup>2</sup>

81 percent organizations with staff shortages.<sup>3</sup>

64 percent software features never used.<sup>4</sup>
